SUMMARY

Senior Software Engineer with 16+ years of experience building secure backend systems, APIs, and business software for fintech, healthcare, banking, and SaaS companies. I have worked on large-scale systems, connected complex platforms, and delivered reliable solutions for high-volume and high-risk business workflows. My background includes .NET, cloud services, API design, authentication, data modeling, and working closely with cross-functional teams in fast-moving environments.

CORE SKILLS

- Backend Engineering: REST APIs, service design, distributed systems, microservices, system integration, backend architecture, system design
- Cloud & Infrastructure: Microsoft Azure, AWS, Docker, Kubernetes, CI/CD, monitoring, logging, performance optimization
- Programming & Platforms: .NET Core, C#, ASP.NET Web API, Angular, React, TypeScript, JavaScript, SQL Server, Redis
- Security & Reliability: OAuth, MSAL, JWT, role-based access control, production troubleshooting, incident handling, high-availability design
- Data & Reporting: SQL, data modeling, ETL, analytics integrations, dashboards, reporting workflows, decision-support systems
- Collaboration & Leadership: stakeholder communication, architecture reviews, mentoring, requirement definition, product delivery, Agile delivery

PROFESSIONAL EXPERIENCE

Senior Software Engineer — KPMG, Microsoft Business Solutions Malta

Marsa, Malta • Oct 2021 – Present

- Built and improved API-based decision support products that connect multiple data sources, analytics outputs, and business workflows in a multi-tenant platform.
- Worked with product, data, and engineering teams to turn business needs into backend patterns, integration contracts, and clean service boundaries.
- Improved code quality and release confidence through code reviews, reusable architecture patterns, testing, and better cross-team delivery practices.
- Delivered secure interfaces for business users and internal teams while balancing speed with system reliability and maintainability.
- Supported AI-assisted decision workflows by connecting front-end applications to backend APIs that expose insights, recommendations, and business data.

Senior Software Developer — Finesse Global

Dubai, UAE • Mar 2021 – Sep 2021

- Designed and delivered a multi-country, multi-language platform serving 20,000+ users across 10 countries and 10+ regional data centers.
- Built high-performance APIs and integrated secure authentication using MSAL, OAuth, and Active Directory for 5+ external applications and enterprise integrations.
- Improved application performance using React, .NET Core, and Redis caching across a distributed architecture.
- Owned the full product delivery cycle from requirements and solution design to development, deployment, and production readiness.
- Worked closely with business and technical stakeholders to convert regional and multilingual requirements into practical product and integration workflows.

Senior .NET Specialist — Randstad India (Shell project)

Bengaluru, India • Jul 2020 – Feb 2021

- Built a Shell Capital Cost Estimation tool from scratch in a distributed Agile team, working across backend integration and front-end architecture.
- Delivered enterprise-level UI and API solutions across global teams, improving clarity of requirements, reuse, and long-term maintainability.
- Implemented reliable application features focused on performance, maintainability, and usability in an enterprise workflow.

Senior .NET Developer — Raqmiyat

India • Nov 2018 – Dec 2019

- Designed and delivered enterprise web applications and integration components for business-critical workflows.
- Contributed across the software lifecycle from requirement analysis and architecture decisions to implementation, testing, and deployment support.
- Worked with distributed teams to turn business requirements into practical, scalable technical solutions.

Associate — Cognizant Technology Solutions

India & United Kingdom • Dec 2014 – Aug 2018

- Delivered client-facing and greenfield solutions across banking, insurance, and healthcare domains.
- Integrated the Qlik Sense Mashup API with AngularJS for a banking risk dashboard to improve access to embedded analytics for decision-making.
- Built insurance forecasting and cost-management solutions to support executive planning and business decisions.
- Automated reporting using Qlik Sense dashboards and NPrinting to reduce manual work and improve visibility.

Senior Software Engineer — HCL Technologies

Chennai, India • Jan 2014 – Dec 2014

- Developed a regulatory reporting application for Standard Chartered Bank Singapore to support compliant reporting workflows.
- Improved data extraction and report generation from ETL systems to make reporting more reliable and repeatable.
- Managed requirements, packaging, deployment, and support activities to reduce handoff issues between engineering and production teams.

Senior Software Engineer — Inatech

India • 2010 – 2013

- Delivered business applications and platform components for enterprise customers with a focus on reliability, maintainability, and customer-driven feature delivery.
- Worked across the software lifecycle from requirements and design to implementation, testing, and production support.
- Contributed to solution design and technical delivery in a collaborative environment serving varied business workflows.

EDUCATION

Bachelor of Engineering, Computer Science Engineering — Anna University, Chennai, India • 2005 – 2008

Diploma in Computer Science and Engineering — Tamil Nadu, India • 2001 – 2004

CERTIFICATIONS & TRAINING

- Microsoft Azure application and platform development training
- Web and Windows application programming coursework through NIIT
- Ongoing professional development in distributed systems, API design, and modern cloud engineering practices
